

Implementing Restorative Justice with Child Victims

Mutual learning and sharing of existing and ongoing best practices between:

Mentee countries:

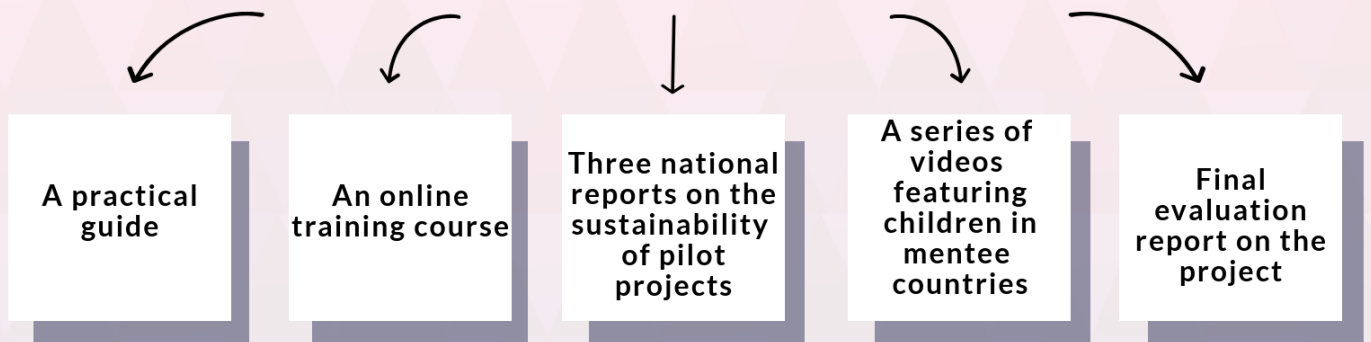

Latvia - State Probation Service (SPS)
Bulgaria - Social Activities and Practice Institute (SAPI)
France - IFJR and DPJJ of the Ministry of Justice

Mentor countries:

Katholieke Universiteit Leuven - **Belgium**
National Institute for Health and Welfare (THL) - **Finland**
Youth Justice Agency - Northern **Ireland**

This project is based on **mutual learning** and **sharing** of existing and on-going **best practices** between these six european countries.

This mutual learning aims to address the victims' needs through a thorough training of professionals from the three mentee countries regarding the use and implementation of a validated RJ practice in Europe throughout the implementation of national coalitions.

Final Conference:

This conference represents an opportunity to present the practical guide and the online course, as well as to produce RJ advocacy material as a mean of implementation of the 2012 victims' directive. It involves a large panel of professionals and representatives of European institutions and organisations to ensure a wide public awareness about the benefits of RJ processes for child victims.

Have a nice conference!
